TypeScript	
Angular	
Ionic	
Jira	
Git/GitHub	
Linux/Shell Scripting	
React	
Tailwind	
Bootstrap	
PHP	
Golang	
MySQL	
C/C++	
Java	
Docker	
Kubernetes	
Vercel	
Railway	

# Nadia Mezini

Fullstack Developer

## Independent Work

### Casino Hub(React + Golang + MySQL)

[casino-hub-psi.vercel.app](https://casino-hub-psi.vercel.app)

For this project I designed, implemented, and deployed a full website independently, exploring a new industry. The focus on this project was to learn GoLang and expand my backend skills. What was new for me in this project:

Frontend (React):

- Implemented Albanian translations using JSON/i18n
- Applied a global theme
- Leveraged lazy loading for performance
- Used loading skeletons for smooth user experience

Backend (Golang):

- Implemented JWT authentication with 24-hour expiry
- Integrated SMTP for automated email exchange
- Created APIs for claiming daily coins/prizes; profile updates; password changes
- Implemented a secure forgot-password flow with time-limited tokens.

### LibraTrack(Angular + PHP + MySQL)

[libra-track-nu.vercel.app](https://libra-track-nu.vercel.app)

LibraTrack is the first project I've made when I decided I wanted to expand my knowledge and become a fullstack developer, so the main focus was PHP.

What was new for me in this project:

Backend(PHP):

- Familiarized with php syntax
- Learned how APIs are generally created using MySQL queries
- Implemented JWT authentication
- Hashed passwords for data security
- Built CRUD APIs
- Used CRON to schedule email notifications for overdue books
- Deployed the backend using Docker for portability and scalability
- Connecting backend and database remotely with the remote frontend and deploying through Railway

Frontend(Angular):

- Developed a full book booking and reservation system
- Created admin and user dashboards
- Implement protected routes
- Integrated services and models for APIs

### My Portofolio(React)

[limonadlia.github.io/portofolio](https://limonadlia.github.io/portofolio)

This website is my personal Portofolio which showcases personal projects, skills, and professional experience. I highly encourage anyone to check it out.

What was new for me in this project:

- Hosting the website via GitHub Pages for public access.

### Krijime Zanash(React)

[krijime-zanash.vercel.app](https://krijime-zanash.vercel.app)

This was my first ever project I've made before I had any experience so I've

# Languages

English

German

only showcased it here to show my progress. What was new for me in this project:

- Familiarized myself with React syntax.
- Learned how to create custom dynamic components.
- Learned how to use premade imported components.
- Learned how to develop a responsive and engaging user experience.
- Learned how to use imported libraries and packages.
- Styled the site using Tailwind CSS and custom typography with Google Fonts.
- Integrated React Icons to enhance UI and visual appeal.
- Demonstrated proficiency in JSX, JavaScript, and modern web development best practices.
- Deployed a website using Vercel.

# Education

**Bachelor of Computer Science**

**Oct 2021 - Jul 2024**

**Faculty of Natural Sciences, Tirane**

Finishing my Bachelor's degree without delay, while also working at the same time was challenging, but I was able to keep up with my studies through independent work. What I learned during this time:

- Time management and self-discipline.
- Foundational knowledge in programming languages (Java, C, C++), data structures, algorithms, and software development methodologies.
- How to develop basic programs and implement algorithms to solve complex problems.
- Web development using HTML, CSS, and JavaScript.
- Collaborating on programming assignments and projects, teamwork and communication skills.
- Attention to detail, logical thinking, and persistence in problem-solving.

# Experience

**Angular Developer**

**Nov 2023 - Nov 2025**

**Blue Hat Shpk, Tirane**

This role was the first job I had in my chosen field of study, thus I gained a lot of real practical skills which helped shape me professionally. Skills gained:

- Developed a strong foundation in Angular, Ionic and Bootstrap for creating scalable and user-friendly applications
- Built cross-platform web and mobile applications
- Applied front-end best practices, including responsive design, API integration, component creation, file structure, work processes and performance optimization
- Hands-on experience in debugging, testing, and collaborating with team members
- Worked within Agile development workflows to deliver features efficiently

# Internships

**DevOps Internship**

**Jul 2024 - Oct 2024**

**TiranalIT, Tirane**

Wanting to always expand my knowledge, I decided to partake in a DevOps internship, where I gained valuable insights into this side of IT. Skills gained:

- Used Jira for project management and GitHub for version control.
- Worked with Docker and Kubernetes for containerization and orchestration.
- Developed skills in Linux and shell scripting for efficient application management and deployment.
- Collaborated with teammates to solve complex problems, enhancing communication and teamwork skills.
